VALUE OF THE ESSENTIAL 7 KIT:

Essential 7 Kit was created by Young Living Essential Oils (YLEO) so that anyone could immediately use and appreciate the benefits of therapeutic-grade essential oils. The Kit contains three single oils: Lavender (*Lavandula angustifolia*), Lemon (*Citrus limon*) and Peppermint (*Mentha piperita*), and four oil blends: Joy, PanAway, Peace & Calming and Purification.

HOW TO USE YOUR ESSENTIAL 7 KIT:

-  **Dietary Supplements:** All single oils may be used as dietary supplements.
-  **Diffuse:** All of the oils may be diffused. The diffuser from YLEO is a special air pump that is custom designed to disperse the oils in a micro fiber vapor. This allows the oils to stay suspended in the air to reduce bacteria, fungi and mold. It also freshens the air with natural fragrances, eliminating the need for synthetic, harmful air fresheners. The diffuser disperses the oils without heat, which could render the essential oils less effective.
-  **Direct Application:** All of the oils can be applied to the Vita Flex points on the feet, added to bath water mixed with YLEO's Bath Gel Base, applied topically or used with body and foot massage.

LAVENDER:

GUIDELINES FOR THE SAFE USE OF YOUNG LIVING ESSENTIAL OILS:

1. Always keep a bottle of V-6 Vegetable Mixing Oil, Massage Oil Base or any pure vegetable oil handy when using essential oils. Vegetable oils dilute essential oils if they cause discomfort or skin irritation.
2. Keep bottles of essential oils tightly closed and store them in a cool location away from light. If stored properly, essential oils will maintain their potency for many years.
3. Keep essential oils out of reach of children. Treat them as you would any product for therapeutic use.
4. Do not use essential oils rich in menthol (such as peppermint) on the throat or neck area of children under 30 months of age.
5. Direct sunlight and essential oils. Lemon, bergamot, orange, grapefruit, tangerine, White Angelica and other citrus oils may cause a rash or darker pigmentation if applied to skin exposed to direct sunlight or UV rays with 3 to 4 days of use.
6. Keep essential oils away from eye area and do not put into ears. Do not handle contact lenses or rub eyes with essential oils on fingers. Oils with high phenol content – oregano, helichrysum, cinnamon, thyme, clove. Lemongrass, bergamot, Thieves and ImmuPower – may damage contacts and irritate eyes.
7. Pregnant women should consult their health care professional before using essential oils containing constituents with hormone-like activity, such as clary sage, sage, Idaho tansy, juniper and fennel.
8. Epileptics and those with high blood pressure should consult their health care professional before using essential oils. Avoid using hyssop, fennel and Idaho tansy oils.
9. People with allergies should test a small amount of oil on a small area of sensitive skin, such as the inside of the arm, before applying the oil on other areas. The bottom of the feet is one of the safest, most effective places to use essential oils.
10. Before taking GRAS (Generally Regarded as Safe) essential oils internally, always dilute with an oil-soluble liquid like honey, olive oil or soy milk.
11. Do not add undiluted essential oils directly to bath water. Use Bath Gel Base as a dispersing agent for oils in the bath.
